

SERVICE UPDATE - MARCH 2, 2022

In accordance with [new masking guidance from the CDC](#) and the end of the State mask mandate, we will soon be lifting a number of COVID restrictions on our campus.

MASKS

Effective **Saturday, March 12th**, face masks will be optional in most settings.* While some are looking forward to removing their masks, others will continue to wear them for their personal safety or perhaps the safety of certain loved ones in their life. We ask that everyone on our campus please respect each person's level of comfort by always carrying a mask with you and donning it when asked.

****Masks will still be required in the Convalescent & Rehabilitation Center and Assisted Living.***

The end of the mask requirement also permits the return of food and drink in common areas. The self-serve coffee bars in the Quinault, Chalet, Chinook, Panorama Hall, and Panorama Auditorium will soon reopen for use.

CAPACITY RESTRICTIONS & RESERVATION REQUIREMENTS

The Panorama Auditorium will now return to full capacity and reservations are no longer required for any event.

Campus fitness rooms at the Aquatic & Fitness Center, Chalet, and Quinault will return to full capacity on March 12th with first-come, first-served access. However, in an effort to ensure the fitness rooms remain accessible, we have created a special window of time for solo exercise. Those who are not comfortable exercising near others without masks may call Erin Dorn at x7772 or email afc@panorama.org to reserve a time slot between 3:00pm and 5:00pm 7 days a week.

COVID CASE TRACKER

With the decreased frequency of new cases on campus, we will be posting a weekly tracker on the [Coronavirus page](#) of Kya and on the Readerboard each Monday. This tracker will reflect the number of new cases reported in the previous week.

We will continue to post immediate updates whenever the visitation or admission status of our Assisted Living or Convalescent & Rehabilitation Center are impacted.

As we enter this next phase of our new normal, we urge everyone to continue following [CDC guidance](#) on how to protect yourself and others. Additionally, we ask for extreme diligence with self-monitoring by staying home if you experience any respiratory symptoms. Our Independent Living Services RN, Marla LeFevre, is always available and happy to assist with questions about symptoms, exposure, and testing options. Please do not hesitate to contact her at x7564 or marla.lefevre@panorama.org.
