

EPISCOPAL COMMUNITIES & SERVICES

The art of creating community

September 3, 2020

COMMUNITY HEALTH BULLETIN

A team member of The Canterbury has tested positive for the virus that causes COVID-19. This person started experiencing symptoms and had a test administered by a private physician. The results came back positive today.

The team member has been away from work since August 30. Contact tracing is complete and there was no significant exposure to residents or other team members. The team member has been self-isolating and will continue to do so for at least 14 days since the onset of symptoms. This person will not return to work until having two consecutive negative results for tests administered at least 24 hours apart.

Along with testing, using the precautions available including wearing a mask, washing your hands and maintaining physical distance from others continues to be our best strategies to protect yourself and others.

If you have any questions or concerns, please contact Sharon Pewtress, COVID-19 Communications Director at covid19info@ecsforseniors.org or 626-476-2647.
