## About Bethel's Rehabilitation Services

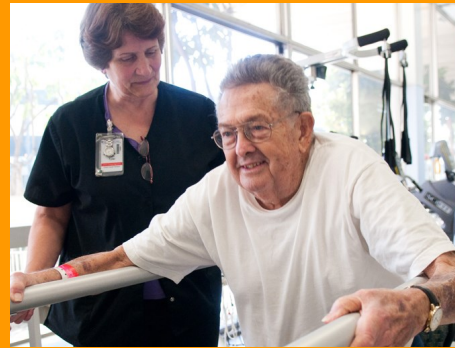

---

With a dedicated, sub-acute unit for short-term rehabilitation residents, Bethel's therapists provide physical, occupational, and speech therapies to help restore residents to their maximum function.

## Resident - Centered Approach

---

Bethel's team of physicians, nurses, therapists, dieticians, social workers and recreation therapists meet with each resident to evaluate their needs. Together, with the resident, they develop a care plan outlining goals and expectations for a safe and quick return to their life and community.

## When to Consider Nursing & Rehabilitation Therapy

---

We treat a variety of diagnoses that include, but are not limited to, amputations, joint replacement, strokes, neurological diseases, cardiac disease, upper & lower extremity fractures, vascular disease, pulmonary disease, deconditioning & other such diagnoses requiring a period of rehabilitation.

## Outpatient Therapy

---

Upon discharge to the community, some patients may be prescribed outpatient therapy for a period of extended support. This assures continuity and familiarity with Bethel's therapists and expedites the patient's progress.
