

EPISCOPAL COMMUNITIES & SERVICES

The art of creating community

August 28, 2020

COMMUNITY HEALTH BULLETIN

A temporary agency caregiver of The Canterbury has tested positive for the virus that causes COVID-19, during this week's testing. This person was without symptoms and last on campus on August 15.

Because the agency employee has been away from campus since the 15th, there was no significant exposure to residents or other team members. This person has been self-isolating and will continue to do so for at least 14 days and will not return to work until having two consecutive negative results for tests administered at least 24 hours apart.

Along with testing, using the precautions available including wearing a mask, washing your hands and maintaining physical distance from others continues to be our best strategies to protect yourself and others.

If you have any questions or concerns, please contact Sharon Pewtress, COVID-19 Communications Director at covid19info@ecsforseniors.org or 626-476-2647.
