

# Dementia in 2022:

## An Update on Diagnosis, Treatment, Research Advances, and Strategies for Healthy Brain Aging

*Presented by Brent P. Forester MD, MSc, chief, division of geriatric psychiatry, McLean Hospital; medical director, behavioral health integration, Partners HealthCare; associate professor of Psychiatry, Harvard Medical School; and co-president, American Association for Geriatric Psychiatry*

Scientists and clinicians worldwide are making advances in the research and treatment of dementia. Dr. Forester will present an update on those advances, provide the latest information

on current diagnosis methods, and review the effectiveness of approved therapies for dementia. He will also delve into the impact of behavioral symptoms of dementia. Finally, he will present the latest research into disease-modifying treatments and your opportunities to enhance healthy brain aging.
